GDPR Compliance Audit

Privacy by Design

DPO as a Service

Data Protection Impact Assessment

External support to DPO

GDPR Support

Information security

Training

GDPR Compliance Audit

What is the GDPR compliance maturity level of your organization? Is your organization at risk of non-compliance? Do you know what data your organization is collecting and processing, where, when and how? MGSI can conduct an audit to determine the appropriate actions required to ensure compliance with the GDPR.

- GDPR compliance audit
- Gap analysis and action plan
- Security audit

DPO as a Service

Is the designation of a DPO mandatory for your organization? Does your organization have the required resources and expertise? MGSI can act as your external DPO to cover your needs and fulfil the GDPR requirements. Benefits of outsourcing the role of DPO to MGSI.

- 🌀 Expertise & Quality
- 🌀 Flexibility & Availability
- 🌀 Independence

External Support to DPO

You have been appointed DPO, but you lack time, internal resources or specific skills to implement your data protection program? MGSI's experts can accompany you on a daily basis or upon demand, helping you to ensure a high level of GDPR compliance and providing you with operational support, in particular for governance, data subject requests or data breaches.

- 🌀 DPO official back-up
- 🌀 Implementation support
- 🌀 Operational support (data breaches, data subject requests, etc.)

Information Security

Organizations must adopt a risk-based approach and implement appropriate technical and organizational measures to ensure a level of security adapted to the risk. MGSI can conduct information security risk analysis to help your organization take a proactive approach to improving information security.

- GDPR: a risk-based approach
- Risk Analysis & Pen testing
- ISO 27001/27002

Privacy by Design

MGSI provides the ability to transform a legal obligation into a business advantage by helping your organization meet the requirements of data protection by design and by default. This requires adopting the necessary data protection measures from the design stage right through the lifecycle.

- Data protection at the early stages of any project involving personal data
- GDPR compliant product development
- Tailor-made support

Data Protection Impact Assessment

GDPR provides for a mandatory DPIA when the processing activity is likely to result in a high risk to the rights and freedoms of natural persons (for instance, processing on a large scale of special categories of data, systematic monitoring of a publicly accessible area on a large scale, etc.). MGSI relies on its expertise in data protection and in risk analysis to assist you in carrying out a DPIA.

- Methodology and process
- Determine if a DPIA is required
- Conduct full DPIA

GDPR Support

You want to comply with the GDPR but do not know where to start or what measures to put in place? MGSI offers a customized support package including the design and implementation of a data governance program adapted to your organization, ensuring the compliance of your processing activities and providing operational support.

- Accountability
- Data subject requests & data breaches
- Implementation
- Operational support
